Patent Cooperation Treaty Update

Accession by Slovenia

The United States Patent and Trademark Office received notification from the World Intellectual Property Organization (WIPO) that Slovenia deposited its instrument of accession to the Patent Cooperation Treaty (PCT) on December 1, 1993. Slovenia will become the 62nd Contracting State of the PCT on March 1, 1994. Consequently, nationals and residents of Slovenia are entitled to the file international applications on and after March 1, 1994, and from the same date it is possible to file international applications designating and electing Slovenia (country Code: SI).

Accession by Trinidad and Tobago

The United States Patent and Trademark Office received notification from the World Intellectual Property Organization (WIPO) that Trinidad and Tobago deposited its instruments of accession to the Patent Cooperation Treaty (PCT) on December 10, 1993. Trinidad and Tobago will become the 63rd Contracting State of the PCT on March 10, 1994. Consequently, nationals

and residents of Trinidad and Togago are entitled to file international applications on and after March 10, 1994, and from the same date it is possible to file international applications designating and electing Trinidad and Tobago (country code: TT).

Withdrawl of Reservation by Poland

The United States Patent and Trademark Office received notification from the World Intellectual Property Organization (WIPO) that Poland has withdrawn its reservation under Article 64(2) of the Patent Cooperation Treaty (PCT) concerning the time limit for furnishing a translation of an international application to the Polish Patent Office as an elected Office. Poland will become bound by the provisions Of PCt Chapter II without any reservations on March 1, 1994.

At present, and until March 1, 1994, where Poland is designed in an international application, a translation of the international application in Polish must be furnished to the Polish Patent Office within 20 months from the priority date, even where Poland is elected for the purposes of Chapter II and the 30-month time limit under PCT Article 39(1) applies for entry into the national phase of processing.

From March 1, 1994, for an international application in relation to which Poland was elected in a demand for intrnational preliminary examination or in a later election, prior to the expiration of the 19th month from the priority date, the time limit for furnishing a translation of the international application into Polish to the Polish Patent Office as an elected Office will be 30 months from the priority date. This 30-month time limit will apply also to international application filed before March 1, 1994, provided that, on that date, the time limit of 20 months from the priority date has not expired.

Declaration of Continuation by Georgia

The United States Patent and Trademark Office has received notification from the World Intellectual Property Organization (WIPO) that Georgia, on January 18, 1994, deposited a declaration the effect of which is that the PCT is applied by Georgia. Consequently, as from January 18, 1994, nationals and residents of Georgia are entitled to file international applications under the PCT, and Georgia (country code:GE) may be designated and elected in international applications. Applicants are, under the PCT Regulations, afforded the possibility of requesting the extension of the effects of any international application filed on or after December 25, 1991 (the date on which the Soviet Union ceased to exist) to States which have made a declaration of continuation. PCT Rule 32 will allow the extension to Georgia of international applications filed between December 25, 1991, and March 18, 1994.

The applicant in respect of each international application concerned, or his agent, will receive a notification from the International Bureau of WIPO, informing him about the possibility and the applicable conditions for extending the effects of his international application toGeorgia.

Regarding Industrial Property In The Kygyz Republic

The following notice is reprinted from the December 1993 edition of "Industrial Property" published by the World Intellectual Property Organization, giving the status of industrial property protection in the Kyrgyz Republic:

The present situation of industrial property protection in the Kyrgyz Republic is summerized below.

I. Legislation

(1) Pending the enactment of the industrial property laws, the Government of the Kyrgyz Republic adopted, on August 2, 1993, the Provisional Regulations on Industrial Property, which cover inventions, utility models, industrial designs and trademarks. It is possible, as of August 2, 1993, to file applicastions for the grant of patents for inventions and for the registration of utility models, industrial designs and trademarks with the Patent Department of the State Committee on Science and New Technologies of the Kyrgyz Republic.

II. Application of International Treaties

(2) The Kyrgyz Republic intends to become party to the Convention Establishing the World Intellectual Property Organization (WIPO), to the Paris Convention for the Protection of Industrial Property, to the Madrid Agreement Concerning the International Registration of Marks, to the Patent Cooperation Treaty (PCT) and to the Nice Agreement Concening the International Classification of Goods and Services for the Purposes of the Registration of Marks.

(3) Announcements will be made as soon as the Kyrgyz Republic becomes party to the treaties mentioned in paragraph (2), above, or to any other treaties administered by WIPO. Details will be given at that stage of the procedures to be followed to confirm the application to the Kyrgyz Republic of certain international applications under the PCT and certain international registrations under the Madrid Agreement.

III. Reregistration of Industrial Property Titles Granted by the Patent Office of the Soviet Union and Further Processing of Pending Applications

(4) The owner of a patent for invention, an inventor's certificate, an industrial design patent or certificate granted by the Patent Office of the Soviet Union and still in force may file directly with the Patent Department of the State Committee on Science and New Technologies of the Kyrgyz Republic before May 1, 1994, a request for the grant of a Kyrgyz patent for invention, design patent or trademark certificate.

(5) An applicant of an application for a patent for invention, for an industrial design patent or for a trademark certificate filed before August 2, 1993, with the express or implied intention of obtaining protection also in the Kyrgyz Republic and pending with the Patent Office of the Russian Federation may file with Patent Department of the State Committee on Science and New Technologies of the Kyrgyz Republic before May 1, 1994, a request that the application be further processed under Kyrgyz legislation.

IV. Procedural Provisions

(6) The procedures referred to in paragraphs (1), (4) and (5) are subject to payment of the prescribed fees.

Procedures For Restarting Response Periods

The purpose of this notice is to announce revised procedures for restarting response periods set in patent related matters. Occasionally, mail from the Patent and Trademark Office (PTO) is received late at the correspondence address or the mail is delayed in leaving the PTO.

The following revised procedures are effective immediately and will be followed in processing a petition to reset a period for response due to late receipt of a PTO action or due to a postmark date which is later than the mail date printed on a PTO action. The authority to decide such petitions is delegated to the Group Director, where the PTO action involved in the petition was mailed by a patent examining group

Petition to reset a period for response due to late receipt of a PTO action

The PTO will grant a petition to restart the previously set period for response to a PTO action to run from the date of receipt of the PTO action at the correspondence address when the following criteria are met: (1) the petition is filed within two weeks of the date of receipt of the PTO action at the correspondence address; (2) a substantial portion of the set response period had elapsed on the date of receipt (e.g., at least one month of a two or three month response period had elapsed); and (3) the petition includes (a) evidence showing the date of receipt of the PTO action at the correspondence address (e.g., a copy of the PTO action having the date of receipt of the PTO action at the correspondence address stamped thereon, a copy of the envelope (which contained the PTO action) having the date of the receipt of the PTO action at the correspondence address stamped thereon, etc.), and (b) a statement (verified if made by other than a registered practioner) setting forth the date of receipt of the PTO action at the correspondence address and explaining how the evidence being presented establishes the date of receipt of the PTO action at the correspondence address.

There is no statutory requirement that a shortened statutory period of longer than thirty days to respond to a PTO action be reset due to delay in the mail or in the PTO. However, when a substantial portion of the set response period had elapsed on the date of receipt at the correspondence address (e.g., at least one month of a two or three month response period had elapsed), the procedures set forth above for late receipt of a PTO action are available. Where a PTO action was received with less than two months remaining in a shortened statutory period of three months, the period may be restarted from the date of receipt. Where the period remaining is between two and three months, the period will be reset only in extraordinary situations - e.g., complex PTO action suggesting submission of comparative data.

Petitions to reset a period for response due to a postmark date later than the mail date printed on a PTO action

The PTO will grant a petition to restart the previously set period for response to a PTO action to run from the postmark date shown on the PTO mailing envelope which contained the PTO action when the following criteria are met: (1) the petition is filed within two weeks of the date of receipt of the PTO action at the correspondence address; (2) the response period was for payment of the issue fee[1] or the response period set was one month or thirty days[2] and (3) the petition includes (a) evidence showing the date of receipt of the PTO action at the correspondence address (e.g., a copy of the PTO action having the date of receipt of the PTO action at the correspondence address stamped thereon, ect.), (b) a copy of the envelope which contained the PTO action showing the postmark date, and (c) a statement (verified if made by other than a registered practitioner) setting forth the date of receipt of the PTO action at the correspondence address and stating that the PTO action was received in the post-marked envelope.

The provisions of 37 CFR 1.8 and 1.10 apply to the filing of the above-noted petitions with regard to the requirement that the petition be filed within two weeks of the date of receipt of the PTO action.

The showings outlined above may not be sufficient if there are circumstances that point to a conclusion that the PTO action may have been delayed after receipt rather than a conclusion that the PTO action was delayed in the mail or in the PTO.

Feb. 3, 1994 CHARLES E. VAN HORN
Patent Policy and Projects Administrator
Office of the Assistant Commissioner for Patents

[1]35 USC 151 permits payment of the issue fee within three months of the date that the Notice of Allowance is mailed to the applicant.
[2]35 USC 133 does not permit a response period to be less than thiry days from the date the PTO action is given or mailed to the applicant.

Response Requested to 1993 Patent Examiner's Action Survey

As part of the continuing quality reinforcement efforts of the Patent and Trademark Office, the Office has sent out a Patent Action Survey Form with each Patent Examiner's Office action mailed during a period of several weeks during December, 1993-January, 1994. **If you have received one or more of these forms, please complete each one, no later than the time of response to the Office action being surveyed.**

The survey is intended to determine whether Office actions are perceived to be clear and complete on certain specific and important items related to patent examining practices and procedures. The results of the survey will be used in the development of Office training programs. The survey is a follow-up to the Patent Action Surveys conducted in 1991 and 1992. Where training is provided to address identified deficiencies in performance, follow-up surveys are intended to be conducted in the future to determine whether the training was effective enough to improve performance in the measured areas.

The Survey Form is brief and easy to complete and does not permit identification of the respondent or of the particular application involved. The Survey Form may be completed at the time of response to the Office Action. It is possible that a practitioner may receive many Office Actions containing a Survey Form during the survey period. To have results that are meaningful, the Office needs a high response rate. Therefore, it is **important** that patent practitioners complete each survey form **no later than the time of response to the Office action being surveyed**. To assure that this form is completed and mailed back to the address indicated on the Survey Form, it would be desirable for patent practitioners to have the Office managers/docketing personnel take appropriate steps to keep the form and Office action together for the practitioner's benefit.

Your cooperation in completing the Survey Form is appreciated.

Acting Assistant Commissioner for Patents

Registration To Practice

The results of the examination for registration to practice before the United States Patent and Trademark Office held on October 13, 1993 were mailed to 1,216 candidates. There were 415 persons who successfully passed the examination. The following list contains the names of those persons who passed the examination and have been given provisional recognition pursuant to 37 CFR § 10.9(a) to prepare and prosecute patent applications before the Office until their registration certificates are mailed to them. Final approval for registration is subject to establishing to the satisfaction of the Director of the Office of Enrollment and Discipline that the person seeking registration is of good moral character and repute. 37 CFR §10.7(a). Accordingly, any information tending to affect the eligibility of any of the following persons on moral, ethical, or other grounds be furnished to the Director of Enrollment and Discipline on or before April 15, 1994.

Reference Collections of U.S. Patents and Trademarks Available for Public Use in Patent and Trademark Depository Libraries

The following libraries, designated as Patent and Trademark Depository Libraries (PTDLs), receive patent and trademark information in various formats from the U.S. Patent and Trademark Office. Many PTDLs have on file all full-text patents issued since 1790, trademarks published since 1872, and select collections of foreign patents. All PDTLs have both the patent and trademark sections of the *Official Gazette of the U. S. Patent and Trademark Office*. The full-text utility and design patents are distributed numerically on 16 mm microfilm, and plant patents on color microfiche. Patent and trademark search systems on CD-ROM (Compact Disc-Read Only) format are available at all PTDLs to increase utilization of and enhance access to the information found in patents and trademarks. It is through the CD-ROM systems that prelminary patent and trademark searches can be conducted through the numerically arranged collections.

All information is available for use by the public free of charge.

In addition, each PTDL offers reference publications which outline and provide access to the patent and trademark classification systems, as well as other documents and publications which supplement the basic search tools. PTDLs provide technical staff assistance in using all materials. Facilities for making paper copies of patent and trademark information are generally provided for a fee.

Since there are variations in the scope of patent and trademark collections among the PTDLs, and their hours of service to the public vary, anyone contemplating use of these collections at a particular library is urged to contact that library in advance about its collections, services, and hours in order to avert possible inconvenience.

SECTION 1.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).

SECTION 2.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).

United States Postal Service Interruption and Emergency In Los Angeles

The January 17, 1994, Los Angeles earthquake has caused a service interruption in United States Postal Service (USPS) in the greater Los Angeles area. Normal postal delivery and collection operations of the USPS were impacted by the earthquake throughout the greater Los Angeles area to varying degrees from January 17, 1994, through January 21, 1994.

The Patent and Trademark Office (PTO) is designating the interruption in the service of the greater Los Angeles area and the overall destruction caused by the earthquake as a postal service interruption and an emergancy within the meaning of 35 U.S.C. 21(a). Any request to accept a paper or fee delayed by the emergency should be directed to Jeffrey V. Nase, Director, Office of Petitions, (703) 305-9285, PK3-704, for patent-related matters, and to Lynne G. Beresford, Trademark Legal Administrator, (703) 305-9464, PK2-910, for trademark-related matters.

Response Requested to 1993 Patent Examiner's Action Survey

As part of the continuing quality reinforcement efforts of the Patent and Trademark Office, the Office has sent out a Patent Action Survey Form with each Patent Examiner's Office action mailed during a period of several weeks during December, 1993-January, 1994. **If you have received one or more of these forms, please complete each one, no later than the time of response to the Office action being surveyed.**

The survey is intended to determine whether Office actions are perceived to be clear and complete on certain specific and important items related to patent examining practices and procedures. The results of the survey will be used in the development of Office training programs. The survey is a follow-up to the Patent Action Surveys conducted in 1991 and 1992. Where training is provided to address identified deficiencies in performance, follow-up surveys are intended to be conducted in the future to determine whether the training was effective enough to improve performance in the measured areas.

The Survey Form is brief and easy to complete and does not permit identification of the respondent or of the particular application involved. The Survey Form may be completed at the time of response to the Office Action. It is possible that a practitioner

may receive many Office Actions containing a Survey Form during the survey period. To have results that are meaningful, the Office needs a high response rate. Therefore, it is **important** that patent practitioners complete each survey form **no later than the time of response to the Office action being surveyed.** To assure that this form is completed and mailed back to the address indicated on the Survey Form, it would be desirable for patent practitioners to have their office managers/docketing personnel take appropriate steps to keep the form and Office action together for the practitioner's benefit.

Your cooperation in completing the Survey Form is appreciated.

Reference Collections of U.S. Patents and Trademarks Available for Public Use in Patent and Trademark Depository Libraries

The following libraries, designated as Patent and Trademark Depository Libraries (PTDLs), receive patent and trademark information in various formats from the U.S. Patent and Trademark Office. Many PTDLs have on file all full-text patents issued since 1790, trademarks published since 1872, and select collections of foreign patents. All PDTLs have both the patent and trademark sections of the *Official Gazette of the U. S. Patent and Trademark Office*. The full-text utility and design patents are distributed numerically on 16 mm microfilm, and plant patents on color microfiche. Patent and trademark search systems on CD-ROM (Compact Disc-Read Only) format are available at all PTDLs to increase utilization of and enhance access to the information found in patents and trademarks. It is through the CD-ROM systems that prelminary patent and trademark searches can be conducted through the numerically arranged collections.

All information is available for use by the public free of charge.

In addition, each PTDL offers reference publications which outline and provide access to the patent and trademark classification systems, as well as other documents and publications which supplement the basic search tools. PTDLs provide technical staff assistance in using all materials. Facilities for making paper copies of patent and trademark information are generally provided for a fee.

Since there are variations in the scope of patent and trademark collections among the PTDLs, and their hours of service to the public vary, anyone contemplating use of these collections at a particular library is urged to contact that library in advance about its collections, services, and hours in order to avert possible inconvenience.

SECTION 2.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).

As part of the continuing quality reinforcement efforts of the Patent and Trademark Office, the Office has sent out a Patent Action Survey Form with each Patent Examiner's Office action mailed during a period of several weeks during December, 1993-January, 1994. **If you have received one or more of these forms, please complete each one, no later than the time of response to the Office action being surveyed.**

The survey is intended to determine whether Office actions are perceived to be clear and complete on certain specific and important items related to patent examining practices and procedures. The results of the survey will be used in the development of Office training programs. The survey is a follow-up to the Patent Action Surveys conducted in 1991 and 1992. Where training is provided to address identified deficiencies in performance, follow-up surveys are intended to be conducted in the future to determine whether the training was effective enough to improve performance in the measured areas.

The Survey Form is brief and easy to complete and does not permit identification of the respondent or of the particular application involved. The Survey Form may be completed at the time of response to the Office Action. It is possible that a practitioner may receive many Office Actions containing a Survey Form during the survey period. To have results that are meaningful, the Office needs a high response rate. Therefore, it is **important** that patent practitioners complete each survey form **no later than the time of response to the Office action being surveyed.** To assure that this form is completed and mailed back to the address indicated on the Survey Form, it would be desirable for patent practitioners to have their office managers/docketing personnel take appropriate steps to keep the form and Office action together for the practitioner's benefit.

Your cooperation in completing the Survey Form is appreciated.

Reference Collections of U.S. Patents and Trademarks Available for Public Use in Patent and Trademark Depository Libraries

The following libraries, designated as Patent and Trademark Depository Libraries (PTDLs), receive patent and trademark information in various formats from the U.S. Patent and Trademark Office. Many PTDLs have on file all full-text patents issued since 1790, trademarks published since 1872, and select collections of foreign patents. All PDTLs have both the patent and trademark sections of the *Official Gazette of the U. S. Patent and Trademark Office*. The full-text utility and design patents are distributed numerically on 16 mm microfilm, and plant patents on color microfiche. Patent and trademark search systems on CD-ROM (Compact Disc-Read Only) format are available at all PTDLs to increase utilization of and enhance access to the information found in patents and trademarks. It is through the CD-ROM systems that prelminary patent and trademark searches can be conducted through the numerically arranged collections.

All information is available for use by the public free of charge.

In addition, each PTDL offers reference publications which outline and provide access to the patent and trademark classification systems, as well as other documents and publications which supplement the basic search tools. PTDLs provide technical staff assistance in using all materials. Facilities for making paper copies of patent and trademark information are generally provided for a fee.

Since there are variations in the scope of patent and trademark collections among the PTDLs, and their hours of service to the public vary, anyone contemplating use of these collections at a particular library is urged to contact that library in advance about its collections, services, and hours in order to avert possible inconvenience.

SECTION 1.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).

SECTION 2.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).
